

# NRMN

Mentoring to Diversify the  
Biomedical Workforce

## The National Research Mentoring Network

Supported by the NIH

### What is NRMN?

A nationwide consortium of biomedical professionals and institutions collaborating to enhance networking and mentorship experiences in support of the training and career development of individuals from diverse backgrounds who are pursuing biomedical research careers.

### Why join NRMN?

This network is committed to changing the face of the biomedical workforce. The NRMN enables mentees across career stages to find effective mentors who will engage in productive and culturally responsive mentorship. It will employ innovative mentor training, unique opportunities for networking, and professional development for mentees. The NRMN is intended to facilitate successful research career progression.

### Who can get involved?

- Undergraduate students
- Graduate students
- Post-Doctoral trainees
- Faculty
- Disciplinary, Professional & Institutional leaders

### What does NRMN offer the Mentee?

- NRMNet: an online resource for mentoring, networking and professional development
- Mentor-mentee matching
- Regional programs on grant writing
- Professional opportunities throughout your career path
- Mentorship in your field that directly addresses diversity, inclusivity and culture

### What does NRMN offer the Mentor?

- National train-the-trainer workshops on mentor training
- Culturally responsive mentoring
- Established and validated standards for effective mentoring relationships
- Synchronous and asynchronous online training
